**AMENDMENTS TO THE SPECIFICATION:**

Please REPLACE the paragraph bridging pages 7 and 8 of the Specification with the following amended paragraph:

Further, the condition detection and display system of the present invention may include: relative speed detecting means for detecting a relative speed of other object relative to the traveling means; and means for grasping a shape of the other object, wherein: if there is an object approaching the traveling means at a relative speed equal to or ~~lower~~ higher than a predetermined value, an image corresponding to the shape of the object is displayed.
